Caring for the Caregiver: Dementia

Laura Ruhle BA, CT Health Educator
Alzheimer’s Association-Greater Michigan Chapter
• Geriatric Education Center of Michigan activities are supported by a grant from the U.S. Department of Health and Human Services, Health Resources and Services Administration, Public Health Service Act, Title VII, Section 753(a).
Learning Objectives

1. Describe the therapeutic relationship among the care recipient, caregiver and health care professionals (Triadic Model of Caregiving)

2. Identify the unique challenges inherent in providing care for individuals with dementia (caregiver vulnerability factors)

3. Recognize caregiver strengths and challenges

4. Identify community-based and online resources for caregivers of individuals with dementia
Alzheimer’s Association
Fact Sheet 2011

• In 2010, 14.9 million family and friends provided 17 billion hours of unpaid care to those with Alzheimer’s and other dementias.

• The economic value of the unpaid care provided to those with Alzheimer’s and other dementias totaled $202.6 billion in 2010.

• More than 60 percent of Alzheimer’s and dementia caregivers rate the emotional stress of caregiving as high or very high; one-third report symptoms of depression.
Alzheimer’s Association
Fact Sheet 2011

• Between now and 2050, Medicare spending on those with Alzheimer’s will increase nearly 600 percent

• Medicaid spending will increase nearly 400 percent
The Facts about Caregiving...

• Emerging public health issue
• Life expectancy has increased
• Caregivers responsibilities are complex and in constant fluctuation
• Communities are affected by the burdens and practicalities of caregiving
• Caregiving affects the quality of life for all of us
Triadic Model of Caregiving

• Identifies the strengths and needs of all in relationship to quality care
• Brings to light the need for dedication, respect and value to the care experience
• Allows for recognition of current realities and projects to the future
• Engages people and societies, politically and scientifically, to seek answers to the complexities of life
Triadic Model of Caregiving

Professional Caregiver:
Physicians, Nurses, Psychologists, Therapists

Family Caregiver:
Immediate Family, Extended Family

Care Recipient:
Any Illness, Any Age
Caregiver Vulnerability Factors

• Alzheimer’s Associations Fact Sheet 2011

• One-fourth of women caregivers experience health problems due to the stress associated with caregiving

• Higher levels of depressive symptoms and mental health problems

• Two-thirds of caregivers report they need to find support for themselves for mental, emotional and physical balance within the care circle and responsibilities
Zarit Burden Interview

A structured caregiver assessment tool using verbal interaction to evaluate levels of stress in family members or caregivers of Alzheimer patients.
Zarit Burden Interview

- On-going assessment process
- Identifies that the disease is a ‘family affair’
- Validates the people in the experience
Zarit Burden Interview

- Assists in using more time/resources more efficiently
- Guides conversation and collects vital information for the evolving Plan of Care
- Identifies changing progress and needs
Support Interventions

National Family Caregiver Support Program

- Informs caregivers about available services
- Assists caregivers in gaining access to services needed
- Provides individual support and counseling
- Assists with respite care

Support Interventions

Family Caregiver Alliance

Online Toolkit to Assist Practitioners Assess the Needs of Family Caregivers

Support Interventions

...the **key** to quality support intervention is to find and combine the unique variety of services that address the needs of the particular caregiving situation...
Caregiving is...

- Interactional process marked by constant change in one’s world which disables one and demands for another

- Requires familial and social support for the well-being of all affected by Dementia
As they say,

“If only I knew what I know now.”

- And Thou Shalt Honor
The Caregiver’s Companion
